

Are you ready to build for the future?

If you're an architect, engineer, consultant, developer, or policymaker, there is no better time to become a Certified Passive House Designer (CPHD) with The Passive House Network. Our CPHD course is the premier Passive House training for building professionals, supported by the 30-year history of global technical leadership of the Passive House Institute. Our flexible curriculum gets you ready for the exam so you can get designing safer buildings for your community.

Design with Passive House

With CPHD training you'll get a comprehensive grounding in the fundamentals of Passive House that prepares you to work successfully on Passive House projects while earning 35 AIA LU/HSW CEUs.

Learning Objectives Include:

1. Describe Passive House goals.
2. Outline Passive House building principles.
3. Describe how architectural and mechanical systems design and detailing directly contribute to final performance outcomes.
4. Complete basic energy calculations on enclosure assemblies and MEP systems that demonstrate effects on overall building energy outcomes.
5. Explain strategies for implementing the Passive House principles in both design and construction phases, conceptually and in construction details and specifications.
6. Describe the process of Passive House design and construction quality assurance and control, from programming and schematic design, through construction and commissioning.

Flexible Training

The course is held with live online sessions and on-demand learning modules, over approximately 8 weeks from kick-off to completion. The pacing of the coursework is designed to meet your busy schedule.

Certification Exam

It is then followed by recommended but optional exam prep for sitting the Certified Passive House Designer Exam and, upon passing, receiving the professional credential.

Join the Next Cohort & Start Today

Cohorts occur four times yearly, starting in January, April, July, and October, with access to learning materials upon registration. Get started today! Next start dates & more course information is [here](#).

Included in Training:

- 35 AIA LU/HSW credits & certificate of completion (awarded at completion of on-demand modules and quizzes)
- On-demand digital course materials
- 2 live-online instructor-led webinars
- 2 Q&A sessions with Passive House practitioners
- Supplemental exam preparation material
- Passive House Planning Package (PHPP) energy modeling software (individual license)
- Digital PHPP Manual
- Supplementary PHPP Course
- Complimentary PHN & iPHA Membership for 1 year
- The CPHD Exam & Exam Prep
